

## QUESTION: WHEN WILL MY WIFE DELIVER THE BABY ?

A Gentle man, Mr.Narayana Murthi, approached me on line on 19/Feb/2009 in the morning. He was saying that his wife was in the last term of Pregnancy and the doctors had given the Expected Delivery date as 10<sup>th</sup> March and my father in law approached an Astrologer known to him who stated that after analyzing his wife's chart that she would deliver the baby on 6<sup>th</sup> March. As he was working as a marketing agent for a private company and he had to travel a lot. As he was not sure about the confirmed delivery dates, he could not pre plan and apply for the leave to his office. Hence he was much in confused stage and asked the following questions:

**When will my wife deliver the Baby ?  
What will be sex of the baby?**

I told him for this, the Horary analysis would be the best way to give the accurate answer. And I asked him to pick a number between 1 and 249 that stroke in his mind.

He answered immediately: **5**

**The Horary chart was analyzed and gave the prediction as follows:**

- a) The Baby will mostly be born on 23/Feb/2009 between 7.44 pm to 9.44pm.
- b) The Baby is likely to be born through Surgical removal (Cesarean)
- c) The Sex of the Baby is mostly "Female".

Also I advised him to be in town with his wife on that date.

### **Result:**

She delivered a beautiful Female Baby on 23/Feb/2009 at 7.50 pm. As there was difficulty in normal delivery, the baby was taken out by Cesarean only.

The Sample Report of the above case is attached here with.

**MR.NARAYAN MURTHI, INDIA**

**QUESTION:**

**WHEN WILL MY WIFE BE THE BABY BE BORN?**  
**WHAT WILL BE THE SEX OF THE BABY?**

**ANALYSIS ON THE HORARY CHART:**

Moon reflects the mind:

Moon is well signifying the 5<sup>th</sup> bava through its Lordship and also through its Sub lord.  
So question about the birth of the baby is correct and the chart is radical

**The Vth Cusp** falls in Cancer 27\* 3' 48'' which is a fruitful sign.  
Vth Cusp is in Moon sign, Mercury Star and Jupiter Sub  
Jupiter is also the sub lord of XIth cusp.

Vth Cuspal sub lord Jupiter is in the star of Moon and Sub of Saturn ( R ).  
Jupiter is close conjunction with Mars (lord of 8 )  
Also Mars aspects the Vth Cusp and also Saturn ( R ) who is posited in 5.

**PREDICTIONS:**

Hence there is more possibility that his wife will have difficulty in delivering the baby as there may be some disturbances in the passage and baby could be born only **by surgery** and both baby and mother will be alright!

**THE SEX :** The Vth Cusp is indicating through its position and also its sublord the possibility of "**Female**" baby is more.

**THE DATE AND TIME OF DELIVERY:**

Then the time of delivery of the baby is analyzed with the chart and also through the Ruling planets.

**The possible date:**

The day when Moon is transiting in the star of Mars on **23/Feb/2009 after 5.45 pm** in the Saturn sign, the baby may be born.

**The possible time of Delivery:**

When the Lagna is transiting in Mercury sign in the star of Sun star or Mars in between **7.44 pm to 9.44 pm**, the possibility of the birth of the Baby is more.

May God Bless both of them!

OM Sai Ram!

Best Regards  
Dr. Adith ji
